

Lumicrest LED lights bring energy savings, bright clear light, and long life reliability.

The PAR30 you've been waiting for! With bright directional light and high CRI for accurate color rendering, it's perfect for galleries and museums, as well as retail and hospitality environments.

While ordinary bulbs burn out quickly and produce more heat than light, our LED PAR30 consumes only 13 watts, six times more energy efficient than halogen lights - for maximum energy savings.

The remarkable new Apturi optical system is unlike anything you've seen before. Apturi's "fly-eye" design captures more light from the LED and directs it outward with minimal glare.

Get the Lumicrest Advantage

Features and Benefits:

- 850 lumen output in 3000K clean white at 95+ CRI
- Apturi optics provide more brightness and less glare
- Lenses can easily be changed to other angles
- Shatter and vibration proof - no filaments or glass
- Simple retrofit to existing fixtures (medium base)
- Single LED eliminates multi-shadowing
- Rugged construction
- Uses only 13 watts of power
- Emits no UV or IR rays
- Contains no mercury
- UL listed for USA and Canada
- CE and RoHS compliant
- Integrated modular power driver
- Available in 15, 20, 35 or 60 degree beam angles
- Generates bright soft white light
- No heat emitted in the beam
- Dimmable, for maximum lighting control
- Attractive, clean design

Perfect for art galleries, hotels, resorts, retail environments and more.

Item	Dimensions (mm)	LED Type	Dimmable	Colour Temperature	CRI	Lens Angles
LMP30A-1	119(H) *96(D)	1 CREE COB LED	Yes	2700k warm white 3000k clean white 4000k natural white	95+	15, 20, 35, 60 degrees

Voltage Input	Power use	Lumen Output	Power Factor	Working Temperature	Weight
110V-120 AC at 60 hz.	13 watts	827 lm for 2700K 850 lm for 3000K	.98	-20C to 45C	272g

Lumicrest brings you the finest selection of high quality, innovative and cost-effective LED lighting solutions.
